SUMMARY

Dynamic and innovative Mobile App and Web Developer with a passion for developing high-performance back-end web applications. Proficient in leveraging emerging technologies to deliver cutting-edge solutions. Skilled at tackling new projects with creativity and precision, while consistently staying updated on industry trends. Committed to delivering exceptional results that drive business growth and user satisfaction.

EDUCATION

Vidya Pratishthan's Arts, Science & commerce College, Baramati.

Bachelor's Degree in Computer Science
2018 – 2021

Modern College GaneshKhind, Pune.

Master's Degree in Computer Science
2021 – 2023

SKILLS

Programming

Java   J2EE   OOP's   Jsp/Servlet   JDBC

MySQL   PosegreSQL   Spring   Spring MVC

Spring-Boot   Hibernate   HTML   CSS

BootStrap

Passion

Editing   Riding A Bike   Exploring New Things

Traveling

CERTIFICATIONS

- Java EE and Java Framework - 3RI TECHNOLOGIES

- Project Development Using Java - Udemy

- Java Programming Masterclass -Udemy

PROJECT

Online-Retail-Shopping

Java, Spring-Boot, Spring-DAO, Hibernate, Postgresql

- Utilizing RESTful API for CRUD operations.
- Handling complex queries with JSON data and annotations.
- Following a structured layered architecture:
  1. Controller: Routes requests to services.
  2. Service: Executes business logic.
  3. Entity: Houses data models.
  4. DAO: Facilitates database communication.

Movie-Ticket-Booking

Java, JSP/Servlet, JDBC, Postgresql

- Created distinct login interfaces for administrators and users.
- Administrators possess the ability to add, schedule, and remove movies, as well as display them in tabular form.
- Users have the capability to select movies, allocate seats, and reserve tickets across silver, gold, and platinum tiers.
- Organized the database into four tables: Administration, Users, Movies, and Shows.

Camping Tools And Equipment

Android, Firebase, Java, XML

- Developing an application-based shopping system for enhanced camping experiences.
- Focus on delivering high-quality products to clients.
- Allows purchasing from the store using Android devices, enabling internet-based shopping from anywhere.
